ABSTRACT

This edition of the annual "Resource Document" provides a comprehensive review of statistics and trends relevant to Ontario, Canada, universities across a range of policy areas. The review is particularly important this year because Ontario is on the verge of experiencing the greatest increase in demand for university opportunities in 30 years. Predictions indicate that enrollment in Ontario is likely to rise by as much as 90,000 students, or 40% within the next 10 years. Provincial operating grants to Ontario universities were \$1,722 million Canadian in 2000-2001. In constant dollar amounts, however, these grants were 24.6% lower than in 1992-1993. Tuition fee revenue has increased dramatically since 1987-1988 but federal government support of Ontario postsecondary education has declined 3.6% in constant dollar terms between 1987-1988 and 1999-2000. Ontario universities rank ninth of the 10 provinces in terms of the percentage of operating income that comes from provincial grants. The report contains these sections: (1) "Grants and Revenue: The Ontario Picture"; (2) "Grants and Revenue: Jurisdictional Comparisons"; (3) "Comparisons with Other Sectors"; (4) "Research"; (5) "Tuition Fees"; (6) "Student Financial Assistance"; (7) "University Infrastructure"; (8) "Faculty and Staff"; and (9) "Education and Employment." Eight appendixes contain information on the methodology for estimating enrollment, university expenses and incomes, and some details of provincial operating grants for Ontario universities. (Contains 43 tables and 40 figures.) (SLD)

Introductory Notes

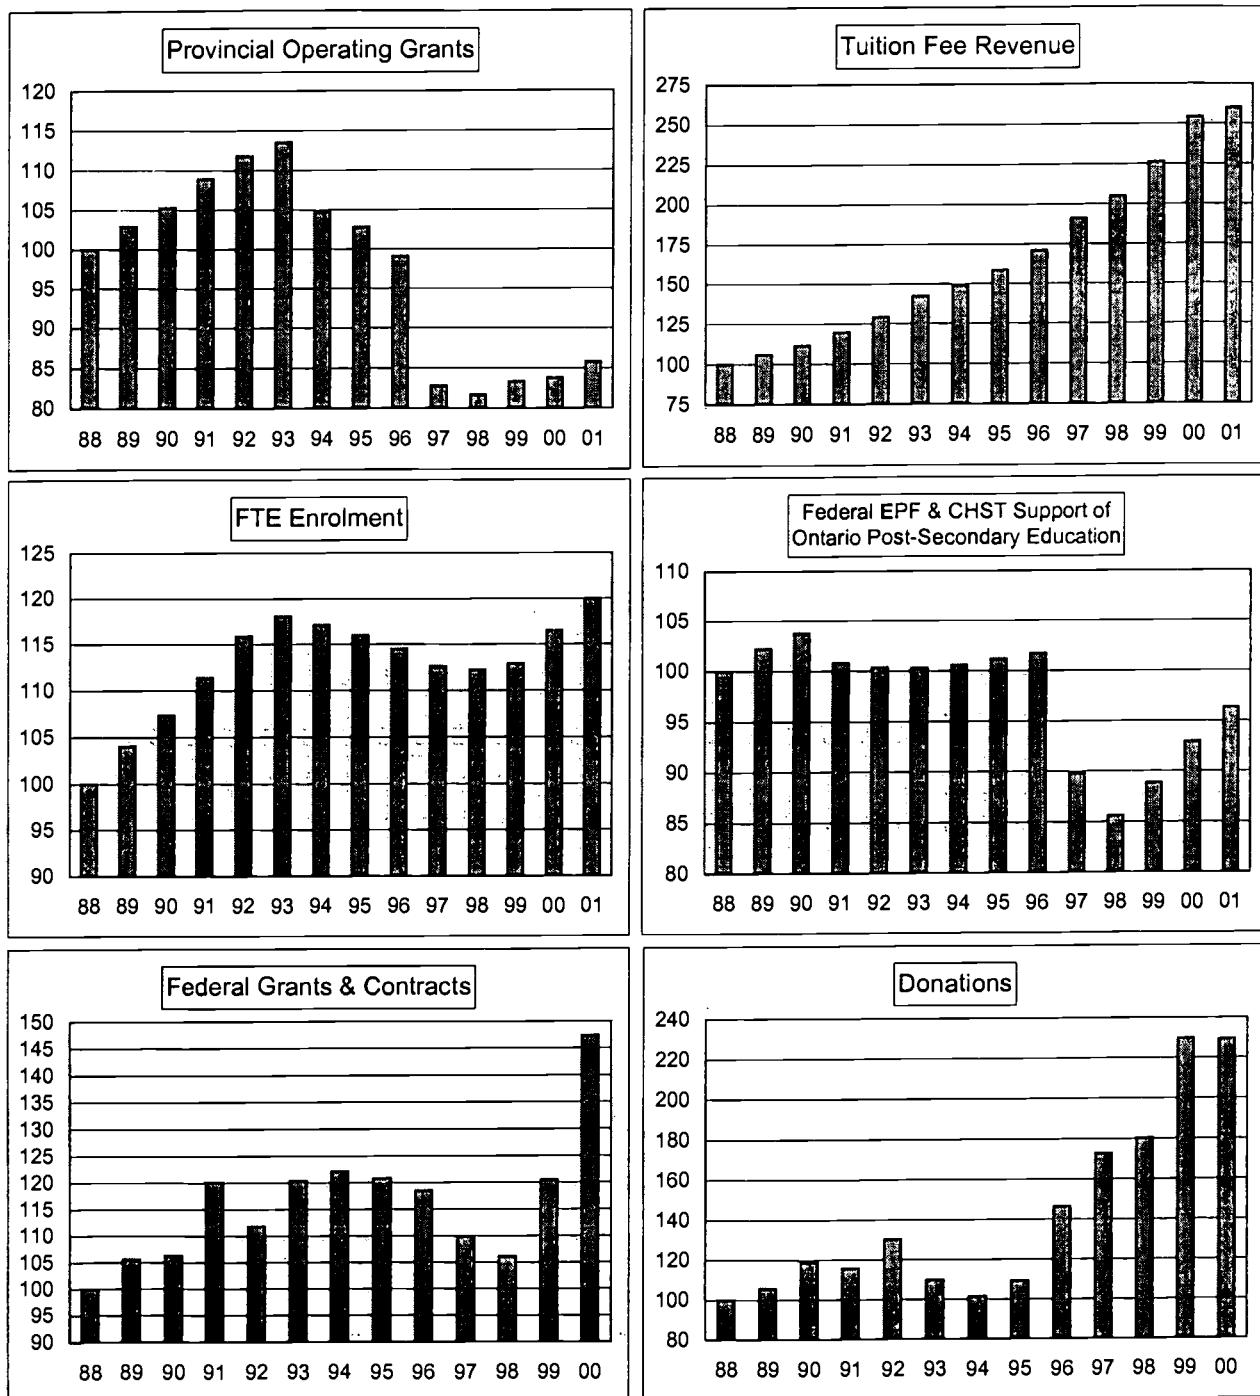

Some data used in this 2000 *Resource Document* are preliminary, estimated or projected, and as such are subject to revision in next year's edition. Likewise, some data have been revised compared to last year's edition.

When a table combines data obtained from different sources, effort is taken to ensure that all data within the table are as comparable as possible and consistent with the purpose of the table. However, data may not always be identically reported between tables. For example, enrolment, financial or other data in one table may be based on a different set of institutions as the same data in another table. Please be sure to read the notes to each table, as well related appendices, when reviewing the tables.

For some tables, the content, sources of data, or methodologies used are different from the corresponding table in last year's edition of the *Resource Document*, and therefore may not be directly comparable.

To the Reader of this Report

The 2000 edition of the Council of Ontario Universities' annual *Resource Document* provides a comprehensive review of statistics and trends relevant to Ontario universities across a range of policy areas including grants and revenue, jurisdictional comparisons, comparisons with other sectors, research, tuition fees, student financial assistance, university infrastructure, faculty and staff, and education and employment.

Context for the Resource Document

This review of statistics and trends is important given that Ontario is on the verge of experiencing the greatest increase in demand for university opportunities in 30 years. Predictions indicate that enrolments in this province are likely to rise by as much as 90,000 or 40% within the next ten years.

Enrolment is expected to increase dramatically owing to the following factors:

- secondary school reform in Ontario will allow students to graduate from high school in four years instead of five and will create a "double cohort" entering university as early as 2003,
- an increase in the population of 18-24 year olds,
- a projected increase in the participation rate or percentage of 18-24 year olds attending university,
- a trend towards more adult learners attending university for additional studies.

A 1998 Angus Reid poll clearly indicated that Ontarians agree with the principle that all qualified students will have the opportunity to receive a university education of a quality that is at least comparable to that offered in competing jurisdictions.

Meeting these expectations will require a major investment by the people of Ontario. The pressure to respond to public expectations and student demand will be strongest at precisely those points where the grant reductions of the 1990s have left universities most vulnerable – in faculty numbers, physical capacity to accommodate increased enrolment, and facilities and resources for teaching, learning and research.

Considerable effort is being taken to help ensure that every qualified and motivated student will be accommodated. Senior-level representatives from the postsecondary community and government have been meeting regularly to consider the most cost-effective ways of responding to the projected major expansion in enrolment.

The funding requirements will be significant and the challenge extends beyond the provincial government. Reductions in federal transfer payments in the 1990s further reduced the resources available to the provincial government for funding universities,

and an increase in federal transfer payments would place the Government of Ontario in a much better position to finance the necessary investment to expand our university sector.

Highlights of this Report

Section 1 - Grants and Revenue: The Ontario Picture

- Provincial operating grants to Ontario universities were \$1,722 million in 2000-01, a 5.0% increase over 1999-00 (Table 1.1). If start-up funding for the Access to Opportunities Program (ATOP) is removed from the calculation, the increase in 2000-01 is 3.4% rather than 5.0%.
- Despite the increases mentioned above, in constant dollar terms grants in 2000-01 are \$562 million, or 24.6%, lower than in 1992-93 (Table 1.1).
- Tuition fee revenue has increased dramatically since 1987-88 (Table 1.1). Beginning in 1996-97 universities were required to set aside for increased student financial assistance a fixed proportion (10% in 1996-97, 30% each year thereafter) of the additional tuition fee revenue attributable to rising tuition fee rates. This "set-aside" is projected to be \$100 million in 2000-01.
- In constant dollar terms, provincial operating grants per student decreased by 29% between 1987-88 and 2000-01, while tuition fee revenue per student increased by 117% (Table 1.2).
- Federal government support of Ontario post-secondary education, through Established Program Financing (EPF) and the Canada Health and Social Transfer (CHST), declined 3.6% in constant dollar terms between 1987-88 and 1999-00 (Table 1.3).
- Growth in Ontario's provincial budget and gross provincial product has largely out-paced funding to Ontario universities since 1987-88 (Table 1.4). Universities' share of the provincial budget dropped steadily from 4.2% in 1987-88 to 2.6% in 1999-00 but improved to 2.8% in 2000-01. Universities' share of gross provincial product (GPP) has continued to drop from 0.64% in 1987-88 to 0.40% in 2000-01 (Table 1.5). If universities had maintained their 1987-88 percentage shares of provincial budget and GDP, university operating grants would have been \$2,888 million and \$2,731 million, respectively, in 2000-01, instead of the actual amount of \$1,722 million.
- Ontario universities have increased their income from donations by 129% and from non-government grants and contacts by 176% in constant dollars since 1987-88. However, after growing rapidly between 1995-96 and 1998-99, donations levelled off in 1999-00 (Table 1.7).

Section 2 - Grants and Revenue: Jurisdictional Comparisons

- Ontario universities rank 9th out of the ten provinces in terms of the percentage of their **operating** income that comes from provincial grants, 2nd in terms of fees, and 3rd in terms of all other sources of income (Table 2.1).
- Ontario universities rank 7th out of the ten provinces in terms of the percentage of their **total** income that comes from federal grants, 9th in terms of provincial grants, 2nd in terms of fees, and 1st in terms of all other sources of income (Table 2.2).
- Ontario government funding for universities fell to 10th out of the ten provinces on a per *student* basis in 2000-01 (Table 2.3), stayed 10th out of ten on a *per capita* basis (Table 2.4), and remained 10th out of ten on a per *personal income* basis for the eighth year in a row (Table 2.5). Provincial funding to Ontario universities would have to increase by about \$728 million to reach the funding per capita level of the other nine provinces, and by about \$482 million to reach the funding per student level.
- In terms of revenue per student and expenditures per student, Ontario universities are 38% and 34% below their peers among public 4-year universities according to 1998-99 data (Tables 2.6).
- Over the past five years — between 1995-96 and 2000-01 — state support for post-secondary education increased by an average of 36.7% in US states, while in Ontario provincial support for post-secondary education declined by 2.9%. Ontario ranked 59th out of the 60 Canadian and US jurisdictions in terms of percentage change in funding over the five-year period (Table 2.7).

Section 3 - Comparisons with Other Sectors

- After several years of decline, constant dollar per client expenditures in Ontario's post-secondary education increased in 1998-99. Since 1987-88 university per client expenditures have grown up by 5% in real terms but in the same period Ontario hospitals have experienced a 73% increase (Table 3.1).
- Compared to other Canadian provinces, Ontario is 26.7% above the average in terms of hospital spending per client and 17.6% above in terms of school spending, but 6.8% below the average in terms of total university spending (Table 3.2).

Section 4 - Research

- Research infrastructure at Ontario universities is in decline. Since 1987-88, sponsored research expenditures have grown by 78.7% in constant dollars, but operating expenditures, which include support for research activities, have grown by only 26.4% (Table 4.1).

- At its inception in 1987-88, the Ontario government's Research Overhead/Infrastructure Envelope represented 20.1% of peer-adjudicated federal research grants. Today, it represents only 15.1% (Table 4.2).
- Over the past ten years, Ontario's share of sponsored research funding from the three major federal granting agencies has decreased from almost 38.9% to just over 37.1% (Table 4.3).

Section 5 - Tuition Fees

- Since 1987-88, tuition fees for Bachelor of Arts programs in Ontario universities have increased from about \$1,500 per year to about \$3,900 per year (Table 5.2).
- Within Canada, only Nova Scotia has higher Bachelor of Arts tuition fees than Ontario (Table 5.3).
- Tuition and required fees in Ontario universities constitute 15.2% of average personal income, compared with 16.2% for public university tuition and fees in the Great Lakes states (Table 5.4).

Section 6 - Student Financial Assistance

- Provincial government spending on financial assistance for Ontario post-secondary students has risen from about \$180 million in 1987-88 to almost \$868 million in 1999-00. The Government projects that this will moderate to \$713 million in 2000-01 (Table 6.1). It is important to keep in mind that the Ontario government made a policy decision to discontinue grants in 1993-94 and replace it with a loan-based system. In recent years, some attention has been paid to restoring the grants through a variety of mechanisms.
- The amount per student that Ontario universities spent on scholarships and bursaries increased by more than 338% between 1987-88 and 1999-00. Expenditures on scholarships and bursaries have increased from 1.6% of total university expenditures to 4.4% (Table 6.2).
- OSAP loan default rates are considerably lower for university students than for students in other sectors of post-secondary education (Table 6.3).

Section 7 - University Infrastructure

- The price of library books and periodicals is increasing more rapidly than library acquisition expenditures, which in turn are increasing more rapidly than total library expenses, which in turn are increasing more rapidly than enrolment (Table 7.1).

Training, Colleges and Universities declined from 55% in 1987-88 to 20% in 1999-00 (Table 7.2). Capital funding from MTCU jumped dramatically in 2000-01 as a result of the SuperBuild program and the necessary investment to accommodate the projected increase in enrolment over the decade.

- On a national scale, Ontario also ranked below average in terms of a number of other capital and plant related indicators in 1998-99 (Table 7.4).
- Ontario universities are operating with only 86% of required space, as measured against established space standards (Table 7.5).

Section 8 - Faculty and Staff

- The number of faculty and staff at Ontario universities declined 10% between 1987-88 and 1999-00, while enrolment has increased 18% (Table 8.1).
- Total faculty and staff salaries, in terms of constant dollars, have also not kept pace with increasing enrolment (Table 8.2).
- Statutory employee benefit costs rose dramatically between 1987-88 and 1999-00 (Table 8.3).
- Ontario universities have the highest ratio of full-time equivalent (FTE) students to full-time faculty, and FTE students to FTE faculty in the country (Table 8.5 and 8.6).

Section 9 - Education and Employment

- Unemployment rates for those with a university degree are consistently and considerably lower than for those without a university degree (Table 9.1).
- The percentage of jobs in Ontario held by university graduates continues to increase, ranging from 17.5% in 1990 to 23.8% in 2000 (Table 9.2).
- Average personal income increases substantially with level of educational attainment (Tables 9.4).

Notes:

Operating Grants:

See Appendix H for details regarding 1998-99 to 2000-01.

Tuition Fees:

Affiliated and federated colleges included.

Estimate of 2000-01 tuition fee revenue reflects combined impact of 2.0% increase in tuition fee rates according to MTCU policy, and 3.0% increase in FTE enrolment.

Beginning in 1996-97 universities were required to set aside for increased student financial assistance a fixed proportion (10% in 1996-97, 30% each year thereafter) of the additional tuition fee revenue attributable to rising tuition fee rates. The "set-aside" was \$11.8M in 1996-97, \$32.5M in 1997-98, \$54.8M in 1998-99, \$84.5M in 1999-2000 and is projected to be \$98.2M in 2000-01.

Notes: All figures in \$000s.
 Constant dollars are in terms of 2000-01 dollars.
 CAP and EPF targeted-funding was replaced by CHST block-funding in 1996-97.

CAP - Canada Assistance Plan - supported Social Welfare.
 EPF - Established Programs Financing - supported health and post-secondary education, with specified amounts for each.
 CHST - Canada Health and Social Transfer - supports social welfare, health, and post-secondary education, without specified amounts for each.

* CHST funding for Ontario post-secondary education estimated by pro-rating total CHST funding for Ontario according to the same proportions of CAP and EPF funding for Ontario post-secondary education in 1995-96.

Sources: Established Programs Financing, and Canada Health and Social Transfer, Canada Department of Finance, Federal-Provincial Relations Division

Notes:

Corresponding Figure 2.3 displays constant 1999-00 dollars, not actual dollars.

Sources:

Operating Grants:

To 1989-90: Interprovincial Comparisons of University Financing, Tripartite (MET, COU, OCUA) Committee on Interprovincial Comparisons, April 1992. Last Tripartite report.

1990-91 onwards: The year-to-year percentage changes in provincial operating grants contained in the Financial Reports of the Canadian Association of University Business Officers were used to estimate provincial operating grants for the purposes of this interprovincial comparison. See Appendix B for a more complete description and example of the methodology. The 2000-01 estimated percentage changes were obtained from the Public Accounts and Expenditure Estimates of Ontario, and, for other provinces, the Association of Universities and Colleges of Canada.

Enrolment:

To 1989-90: Interprovincial Comparisons of University Financing, Tripartite (MET, COU, OCUA) Committee on Interprovincial Comparisons, April 1992. Last Tripartite report.

1990-91 onwards: The year-to-year percentage changes in FTE enrolment provided by Statistics Canada were used to estimate FTE enrolment for the purposes of this interprovincial comparison. See Appendix B for a more complete description and example of the methodology. 1999-00 and 2000-01 estimated percentage changes were obtained from MTCU and AUCC.

Notes: Canada Data is based on funding for universities only.
 British Columbia data excludes 3 university colleges that were added to the CAUBO dataset in 1997-98, creating a significant discontinuity in the time series.

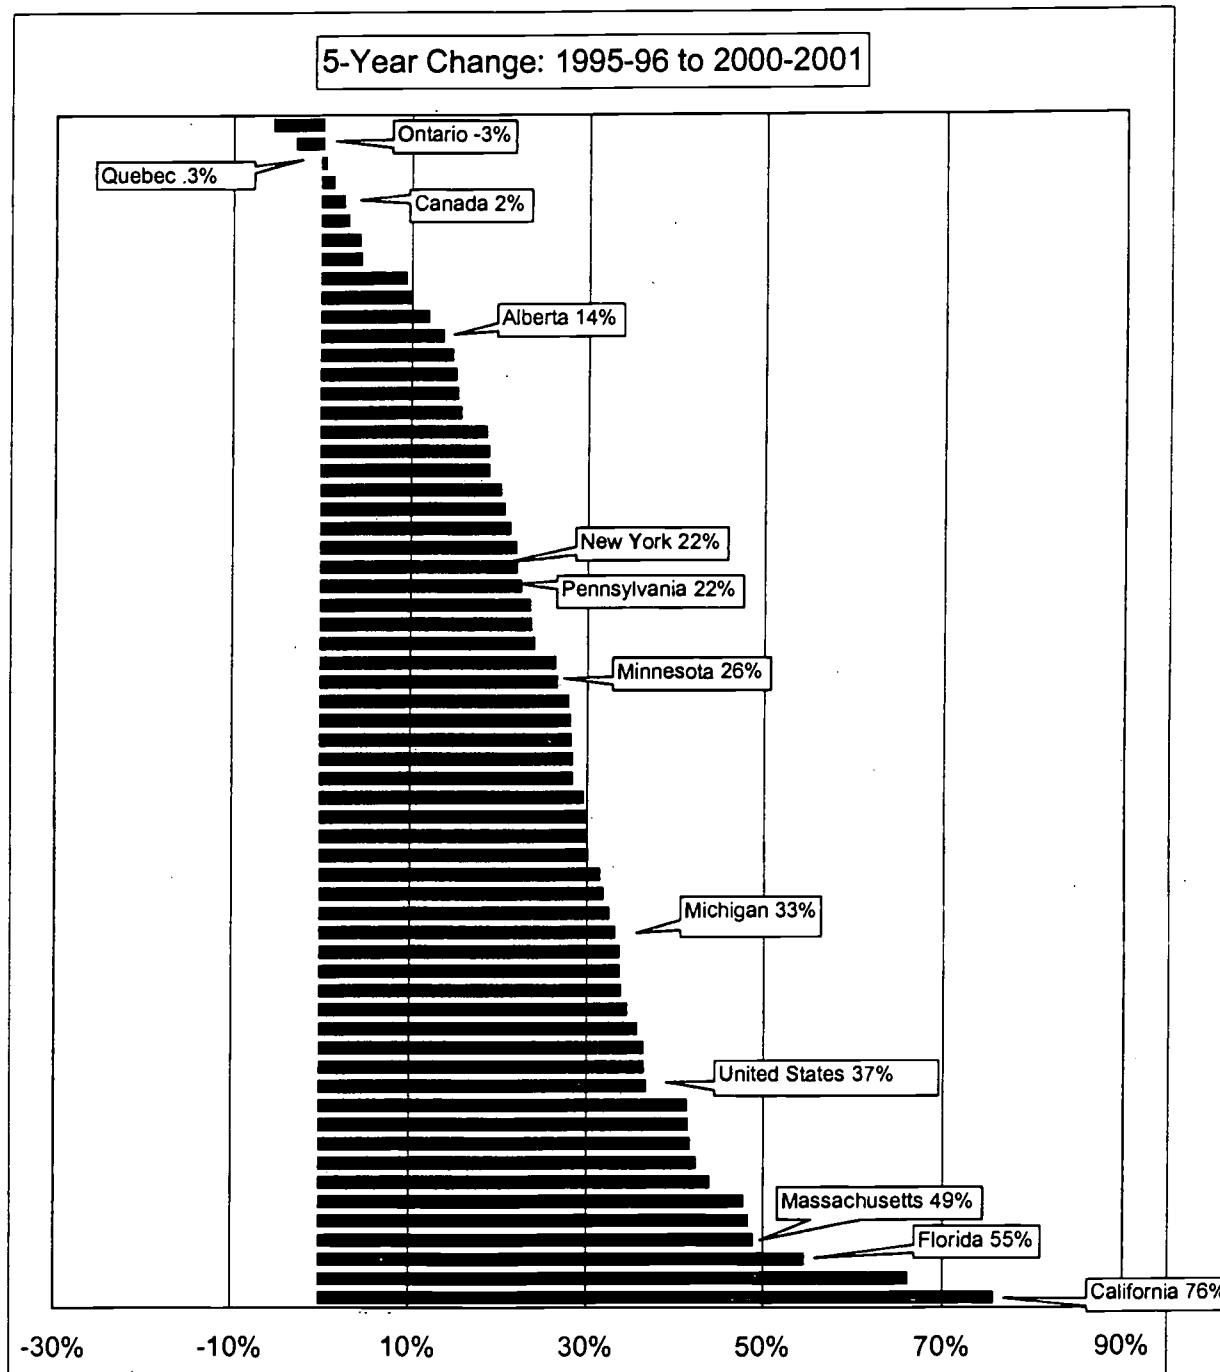

USA Data is based on funding for universities, community colleges, and student support.

"11 Selected States" are the 8 Great Lakes states plus the 3 other largest population states. These states collectively have more than half the population of the United States.

Sources: Canada 1994-95 to 1997-98: Statistics Canada, Canadian Association of University Business Officers (CAUBO), Financial Statistics of Universities and Colleges, various years.
 1998-99 to 1999-00: Based on percentage changes reported by AUCC in Aug/Sep 1999 issue of "University Affairs," except for Ontario which is based on percentage changes as calculated from Ontario Public Accounts and Ontario Expenditure Estimates.

1999-00	0.0%	\$2,386	62.36%	\$3,874	\$27,591	14.0%	\$66,108	5.9%

Notes:

Fees are for full-time Canadian students.
The Maximum Discretionary Component (MDC) is expressed as a percentage of the Formula Fee Rate.
Maximum Tuition Fee (MTF) = Formula Fee Rate * (1 + MDC).
Partial deregulation of tuition fees began in 1996-97. For 1996-97 and thereafter, the MDC in this table represents the average, across ALL programs, allowed for each institution. Each institution has some flexibility to set tuition fee rates for individual programs above this MDC, as long as their institutional average, weighted by enrolment, does not exceed this MDC.
Average personal and family income are for Ontario.

Notes: Minimum, average, and maximum tuition fees are taken across all Ontario universities that offer the program. Fees are for full-time Canadian students. Average columns are not weighted by enrolment of individual institutions. University of Waterloo BEng tuition fee includes coop fee for 1989-90 through 1994-95, and excludes coop fee for 1995-96 onwards.

2000-01 inflation rate is estimated to be 2.8%.

Notes:

All Ontario data in \$Cdn, all US data in \$US.

Ontario: full-time Bachelor of Arts tuition + compulsory ancillary fees retained by institution.

US: full-time undergraduate in-state tuition + required fees.

Average tuition fees column is not weighted by enrolment of individual universities.

Average personal income data is for 1999-2000.

"Total" row for average tuition fees not weighted by number of universities in each state.

"Total" row for average personal income is not weighted by population of each state.

Minnesota does not have any research or doctoral level private universities.

Notes: Expenditures: Total funds spent on renovations & alterations + buildings + land & site services. Excludes ancillary.
FTE Enrolment: full-time enrolment + (part-time enrolment / 3.5), undergraduate + graduate.

Ratio: 10-year average = sum of 10-year expenses in constant 1998-99 dollars / sum of 10-year FTE enrolment.

Sources: Expenditures: Statistics Canada, Canadian Association of University Business Officers (CAUBO), Financial Statistics of Universities and Colleges.
Full-time and part-time enrolment: Statistics Canada.

Notes: Percentages are based on 10-year averages calculated in terms of constant 1998-99 dollars.

Capital Expenditures = Total Funds from all sources spent on Buildings + Renovations & Alterations + Land & Site Services.

Plant Income = Grants and related interest income for the purpose of capital expenditures on furniture & equipment, major renovations & alterations, space rental, buildings, and land & site services.

Total University Income & Expenditures = Total for General Operating + Special Purpose & Trust + Sponsored Research + Ancillary Enterprises + Plant

Source: COU Triennial Inventory of Physical Facilities of Ontario Universities.

Notes: Space is measured in net assignable square meters.
 "Generated Space" is calculated using established space standards -- "COU Building Blocks" -- which depend on category of space, program classification, and input measures (FTE enrolment, FTE faculty, FTE graduate students, weekly student contact hours, FTE non-academic staff, and library volumes).
 "Other Space" is an aggregate of the following space categories: academic departmental offices and related space, athletic and recreational space, food services, bookstore and other merchandising facilities, plant maintenance, administrative office and related space, audio-visual and television facilities, central services, health service facilities, common use and student activity space, and assembly and exhibition space. Excluded are non-assignable space as well as the following non-formula space categories: residential space, animal space, other university facilities, and health science clinical facilities.

Notes:

Because counts of Full-Time Faculty for OCAD are not available from Statistics Canada, in order to be consistent all data in this table are based on the 17 Ontario universities, with OCAD excluded. See notes to Table 8.5 for details on the methodology for counting full-time faculty. Because estimates of full-time faculty counts are used to compensate for occasional unreported data by specific universities in specific years, the counts in this table are, for some years, higher than those provided in COU's annual "Facts and Figures" report, where unreported counts are not estimated. 1998-99 and 1999-2000 data is from Facts and Figures 2000. Due to survey methodologies, the FTE Faculty and Staff column (the sum of the three previous columns) does not represent all faculty and staff employed by Ontario universities.

FTE Enrolment: COU estimate of Fall, eligible + ineligible, undergraduate + graduate, full-time equivalent enrolment (see Appendix A).

Sources:

Full-time faculty: Statistics Canada, Salaries and Salary Scales of Full-time Teaching Staff at Canadian Universities.

Part-time faculty: Council of Ontario Universities, Survey on Faculty Complements.

Non-academic staff: Council of Ontario Universities, Survey on Non-academic Employees.

Full-time and part-time enrolment: Ministry of Training, Colleges and Universities.

Notes:

Elementary & Secondary Schools: Average class size. Special education classes are excluded.
 Figures are not available before 1989-90 for elementary and before 1993-94 for secondary.
 Community Colleges: Full-time post-secondary enrolment / full-time academic employees.
 Universities: Full-time enrolment / full-time faculty. Based on the 17 Ontario universities, with OCAD excluded, since full-time faculty counts are not available for OCAD from Statistics Canada.
 See notes to Table 8.5 for details on the methodology for counting full-time faculty.

Indices: Relative to 1993-94, the first year for which all four indicators are available.

Sources:

Elementary & Secondary Schools: Ministry of Education.
 Community Colleges: Ministry of Training, Colleges and Universities.
 Universities: Enrolment from Ministry of Training, Colleges and Universities. Faculty from Statistics Canada.

Notes:

Student / faculty ratios are based on a set of 48 "core" universities in Canada; the same 48 universities that are included in Maclean's magazine's annual ranking of Canadian universities.

FTE enrolment = full-time enrolment + (part-time enrolment) / 3.5.

Full-time faculty counts include all teaching ranks, and medical and dental teaching staff. Excluded are part-time teaching staff, senior administrators, staff on leave of absence, visiting professors, and staff not on regular pay scale. A change in the definition of full-time faculty by Statistics Canada in 1991-92 caused the number of full-time faculty to drop by 350 (2.42%) in Ontario and by 994 (2.66%) in Canada in that year. COU estimates of full-time faculty counts are used to compensate for occasional unreported data by specific universities in specific years in order to provide consistent and comparable student / faculty ratios.

Sources:

Enrolment: Statistics Canada.

Full-time faculty counts: Statistics Canada, Salaries and Salary Scales of Full-Time Teaching Staff at Canadian Universities and Colleges.

Notes:

Student / faculty ratios are based on a set of 48 "core" universities in Canada; the same 48 universities that are included in Maclean's magazine's annual ranking of Canadian universities.

FTE enrolment = full-time enrolment + (part-time enrolment) / 3.5.

FTE faculty cannot be obtained directly due to lack of data on part-time faculty. Rather, FTE faculty are estimated according to the equation: FTE faculty = (total academic ranks salaries + total instruction & research salaries) / (average salary of full-time faculty). Average salaries are based on the set of full-time faculty that includes all teaching ranks, and medical and dental teaching staff. Excluded are part-time teaching staff, senior administrators, staff on leave of absence, visiting professors, and staff not on regular pay scale. COU estimates of average salaries are used to compensate for occasional unreported data by specific universities in specific years in order to provide consistent and comparable student / faculty ratios.

APPENDIX A

NOTES ON ENROLMENT

The basic approach in this *Resource Document* is to examine the university enterprise from a global perspective. Therefore, all enrolment figures are based on total fall term undergraduate plus graduate enrolment, regardless of whether the students are eligible or ineligible for Ontario government formula-funding.

Ontario-Only Tables

- The source of full-time and part-time enrolment figures is the Ontario Ministry of Training, Colleges and Universities (MTCU).
- **Table 8.4** uses full-time enrolment.
- **Tables 1.2, 3.1, 6.2, 7.1, 8.1 and 8.2** use FTE enrolment, calculated according to the equation:

$$\text{FTE enrolment} = \text{full-time enrolment} + (\text{part-time enrolment} / 3.5). \quad [1]$$

- **Tables 1.2, 3.1, 6.2, 7.1, and 8.2** are based on Ontario's 17 universities, the Ontario College of Art and Design (OCAD), and Dominicain College. OCAD and Dominicain receive government support from the Universities Branch of MTCU.
- **Tables 8.1 and 8.4** are based solely on Ontario's 17 universities. OCAD and Dominicain are excluded because these tables include counts of full-time faculty, and Statistics Canada does not collect such counts for OCAD and Dominicain.

Comparisons with Other Provinces

- The source of full-time and part-time enrolment figures is Statistics Canada.
- **Tables 7.3, 8.5 and 8.6** use FTE enrolment calculated according to equation [1].
- For **Table 7.3**, enrolment figures are standard provincial totals published by Statistics Canada. Statistics Canada's standard provincial total for Ontario is based on the 17 universities, Dominicain College, the Royal Military College, Redeemer College, and the Ontario Bible College and Theological Seminary. OCAD is excluded.
- For **Tables 8.5 and 8.6**, enrolment figures are based on a set of 48 "core"

universities in Canada, the same 48 universities that are included in Maclean's magazine's annual ranking of Canadian universities. This set of universities is considered to be appropriate for the calculation and comparison of student/faculty ratios, the focus of these two tables. For Ontario, only the 17 universities are included in the "core" set.

- **Table 2.3** – FTE enrolment figures prior to 1990-91 are taken from the annual reports of the Tripartite (MTCU, COU, OCUA) Committee on Interprovincial Comparisons of University Financing. The original source for the Committee's data was Statistics Canada. The data represents eligible and ineligible fall term enrolment, and FTE enrolment is calculated according to equation [1]. Adjustments have been made to Statistics Canada's standard provincial totals for college-to-university transfer students and for interprovincial transfer students. Interprovincial transfer students are those who are registered in a program at an out-of-province university but are funded by their home province's government. Enrolment figures correspond to the set of universities used for Table 7.3. For the methodology used to calculate FTE enrolment commencing in 1990-91, see Appendix B.
- **Table 3.2** – FTE enrolment is derived the same way as in Table 2.3, with the exception that the adjustment for interprovincial transfer students is not done. Enrolment figures correspond to the set of universities used for Table 7.3. For the methodology used to calculate FTE enrolment commencing in 1990-91, see Appendix C.

Comparisons with American States

- **Table 2.6** – FTE enrolment for Ontario's 17 universities is based on eligible and ineligible fall term enrolment figures obtained from MTCU. OCAD and Dominicain are excluded. In these tables, FTE enrolment is calculated according to the equation:

$$\text{FTE enrolment} = \text{full-time enrolment} + (\text{part-time enrolment} / 3.5).$$

The source for US enrolment data (fall term, full-time and part-time) is the Integrated Postsecondary Education Data System (IPEDS) published by the National Center for Education Statistics of the U.S. Department of Education. It can be found at <http://nces.ed.gov/ipeds/>.

APPENDIX B

METHODOLOGY FOR ESTIMATING EACH PROVINCE'S UNIVERSITY OPERATING GRANTS PER FTE STUDENT

- 1989-90 and Before: Actual "Net Total Operating Grants" were divided by actual "Net Total Enrolment". These data were sourced from the Tripartite Committee on Interprovincial Comparisons, April 1992, which was the last year of its publication.
- 1990-91 and After: Estimates of annual percent change were applied against the last actual figures of 1989-90.

EXAMPLE: ONTARIO

Estimate of Ontario Operating Grants to Universities per FTE Student in 1990-91
(post Tripartite Committee): \$6,772

CALCULATION:

PART 1:	OPERATING GRANTS	(For Tables 2.3, 2.4 and 2.5)
1989-90 -	Last year Tripartite Committee reported actual Net Total Operating Grants for Ontario:	\$1,599,386,000
1989-90 -	Ontario operating grants reported in CAUBO:	\$1,724,504,000
1990-91 -	Ontario operating grants reported in CAUBO:	\$1,869,822,000
1989-90 to 1990-91	percent change using CAUBO data (*):	8.43%
1990-91 -	Estimated Net Total Operating Grants = \$1,599,386,000 * 1.0843	\$1,734,160,738
PART 2:	FTE ENROLMENT	(For Table 2.3)
1989-90 -	Last year Tripartite Committee reported actual Net Total Enrolment for Ontario:	247,053
1989-90 -	Ontario total enrolment reported by Statistics Canada:	237,876
1990-91 -	Ontario total enrolment reported by Statistics Canada:	246,577
1989-90 to 1990-91	percent change using Statistics Canada data:	3.66%
1990-91 -	Estimated Net Total Enrolment = 247,053 * 1.0366	256,090
PART 3:	OPERATING GRANTS PER FTE ENROLMENT	(For Table 2.3)
1990-91 -	Estimated Net Total Operating Grants	\$1,734,160,738
	Divided by Estimated Net Total Enrolment	256,090
	Equals Ontario Operating Grants to Universities per FTE Student	\$6,772

- (*) 1990-91 to 1997-98: For each of these years the annual percent change was calculated from the operating grants reported in the Financial Reports of the Canadian Association of University Business Officers.
1998-99 to 1999-00: The annual percent change to operating grants for these two years were obtained from the Public Accounts and Expenditure Estimates of Ontario, and, for other provinces, the Association of Universities and Colleges of Canada.

APPENDIX C

METHODOLOGY FOR ESTIMATING EACH PROVINCE'S UNIVERSITY OPERATING EXPENDITURES PER FTE STUDENT

1989-90 and Before: Actual "Total Operating Expenditures" were divided by actual "Enrolment - Provincial Institutions (excluding interprovincial transfers)". These data were sourced from the Tripartite Committee on Interprovincial Comparisons, April 1992, which was the last year of its publication.

1990-91 and After: Estimates of annual percent change were applied against the last actual figures of 1989-90.

EXAMPLE: ONTARIO

Estimate of Ontario Total University Operating Expenditures per FTE Student
in 1996-97 (post Tripartite Committee): \$9,876

CALCULATION: (For Table 3.2)

PART 1: OPERATING EXPENDITURES

1989-90 -	Last year Tripartite Committee reported actual Total Operating Expenditures for Ontario:	\$2,131,704,000
1989-90 -	Ontario operating expenditures reported in CAUBO:	\$2,254,667,000
1996-97 -	Ontario operating expenditures reported in CAUBO:	\$2,710,446,000
1989-90 to 1996-97 percent change using CAUBO data *:		20.21%
1996-97 -	Estimated Total Operating Expenditures = \$2,131,704,000 * 1.2021	\$2,562,626,135

PART 2: FTE ENROLMENT

1989-90 -	Last year Tripartite Committee reported actual Net Total Enrolment for Ontario:	247,084
1989-90 -	Ontario total enrolment reported by Statistics Canada:	237,876
1996-97 -	Ontario total enrolment reported by Statistics Canada:	249,808
1989-90 to 1996-97 percent change using Statistics Canada data:		5.02%
1996-97 -	Estimated Net Total Enrolment 247,084 * 1.0502	259,478

PART 3: OPERATING EXPENDITURES PER FTE ENROLMENT

1996-97 -	Estimated Total Operating Expenditures Divided by Estimated Net Total Enrolment	\$2,562,626,135 259,478
	Equals Ontario Total University Operating Expenditures per FTE student:	\$9,876

* 1990-91 to 1996-97: For each of these years the annual percent change was calculated from the operating expenditures reported in the Financial Reports of the Canadian Association of University Business Officers.

APPENDIX D

ONTARIO UNIVERSITY NON-SALARY PRICE INDEX (OUNSPI) AND CANADA CONSUMER PRICE INDEX (CPI) 1980-81 to 1999-00

	OUNSPI	CPI	Annual Percent Increase	
	OUNSPI	CPI	OUNSPI	CPI

1999-00	217.7	204.5	1.6	2.2

Notes:

CPI and OUNSPI are relative to base year 1980-81 = 100.0.

The Ontario University Non-Salary Price Index was developed in 1978 to provide "a more sensitive tool to assist in measuring the likely impact of inflation on non-salary expenditure, and a more accurate measure of the extent of inflationary erosion between any two years. (*)"

(*) - Council of Ontario Universities, "Ontario University Non-Salary Price Index," February 1978.
